Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-14 are indefinite because they omit essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01.

Claim 3 is indefinite because the term "effectively" is a relative term lacking proper comparative basis.

Claim 3 is indefinite because the term "the action of said magnetic force" lacks proper antecedent basis.

Claims 8- 11 and 13 are indefinite because it is not clear how the recited functions limit the structure of the claimed apparatus.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1746

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Malin (US Patent No 3,514,328).

Malin teaches an apparatus as claimed. See entire document, especially Figs. 1 and 2 and the related description, Background of Invention and Description of Preferred Embodiment.

5. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Komanduri et al (US Patent NO 5,931,718).

Komanduri et al teach an apparatus as claimed. See entire document, especially Fig. 1 and the related description.

6. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakano (US Patent No 5,044,128).

Nakano teaches an apparatus as claimed. See entire document, especially Figs. 1, 2, 4, 5 and the related description.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following documents are made of the record to show the state of the prior art with respect to apparatuses for cleaning utilizing magnetic cleaning:
